Amazing marine and sea-shore life discovery eco-tour

Miyajima is situated in Seto Inland Sea, 25 min. from Hiroshima Station by JR line. The island is one of the three main tourist spots of Japan. Itsukushima Shrine, legendary Misen Mountain, objects of arts and crafts varying from Heian to Edo Period and numerous historical monuments of Miyajima island constitute an important part of national cultural heritage.

A small group of privileged tourists will take a private boat to discover the secrets of the island guided by a renowned professor and professional interpreter, who will lead you to its most beautiful natural places that are only accessible from the sea. This is a unique chance to make a pilgrimage to the 7 shrines and prey for good fortune as shoguns and emperors would in Medieval Japan, discover Miyajima's authentic nature, amazing culture and history.

<Program>

19/09/2014 (Friday) night at **Hiroshima Washington Hotel**
